ELSEVIER SCIENTIFIC PUBLISHERS IRELAND

Toxicology 86 (1994) 241–243

TOXICOLOGY

Subject Index Volume 86 (1994)

agent GA, tabun, phosphoroamidocyanidic acid, dimethyl-, ethyl ester, genotoxicity, mutagenic assays, 1
allyl alcohol, 2-propen-1-ol, dithiothreitol, protein thiol groups, isolated rat hepatocytes, 147
alveolar macrophage, heavy metal interactions, superoxide anion release, 13
antibody response, corticosterone, immunotoxicity, natural killer cell, pentabromodiphenyl ether, thyroxine, 49
avarone, glutathione, protein thiols, HepG2 cells, 89

N-benzyl-D-glucamine dithiocarbamate, cadmium, excretion, distribution, chelate effect, *N*-*p*-hydroxymethylbenzyl-D-glucamine dithiocarbamate, 175

cadmium, excretion, distribution, chelate effect, *N*-benzyl-D-glucamine dithiocarbamate, *N*-*p*-hydroxymethylbenzyl-D-glucamine dithiocarbamate, 175
chelate effect, cadmium, excretion, distribution, *N*-benzyl-D-glucamine dithiocarbamate, *N*-*p*-hydroxymethylbenzyl-D-glucamine dithiocarbamate, 175
chlordecone, hepatobiliary dysfunction, membrane permeability, plasma membrane, disposition, 123
chlorinated dibenzo-*p*-dioxins, tryptophan 2,3-dioxygenase, tyrosine amino transferase, dose-response, structure-activity relationship, 63
corticosterone, antibody response, immunotoxicity, natural killer cell, pentabromodiphenyl ether, thyroxine, 49
cytochrome P4504A1, perfluoro-*n*-octanoic acid, peroxisome proliferation, enzyme induction, 109

developmental toxicity, di-*n*-butyl phthalate, phthalic acid ester, rat, teratogenicity, fetal malformation, 163

di-*n*-butyl phthalate, developmental toxicity, phthalic acid ester, rat, teratogenicity, fetal malformation, 163
2,3-dimercaptopropane-2-sulfonate, duodenal mucosa, enzyme inhibition, enzyme protection, kidney, mercuric chloride poisoning, 29
dimethyl-, ethyl ester, tabun, agent GA, phosphoroamidocyanidic acid, genotoxicity, mutagenic assays, 1
disposition, chlordecone, hepatobiliary dysfunction, membrane permeability, plasma membrane, 123
distribution, cadmium, excretion, chelate effect, *N*-benzyl-D-glucamine dithiocarbamate, *N*-*p*-hydroxymethylbenzyl-D-glucamine dithiocarbamate, 175
dithiothreitol, allyl alcohol, 2-propen-1-ol, protein thiol groups, isolated rat hepatocytes, 147
dopamine, polychlorinated biphenyls (PCBs), non-human primate (*Macaca nemestrina*), neurochemical effects, 71
dose-response, chlorinated dibenzo-*p*-dioxins, tryptophan 2,3-dioxygenase, tyrosine amino transferase, structure-activity relationship, 63
duodenal mucosa, 2,3-dimercaptopropane-2-sulfonate, enzyme inhibition, enzyme protection, kidney, mercuric chloride poisoning, 29

environmental pollution, macrophages, toxicology, immunology, pathology, 213
enzyme induction, cytochrome P4504A1, perfluoro-*n*-octanoic acid, peroxisome proliferation, 109
enzyme inhibition, duodenal mucosa, 2 3-dimercaptopropane-2-sulfonate, enzyme protection, kidney, mercuric chloride poisoning, 29
enzyme protection, duodenal mucosa, 2 3-dimercaptopropane-2-sulfonate, enzyme inhibition, kidney, mercuric chloride poisoning, 29
excretion, cadmium, distribution, chelate effect,

SSDI 0300-483X(93)02819-G

N-benzyl-D-glucamine dithiocarbamate, *N*-*p*-hydroxymethylbenzyl-D-glucamine dithiocarbamate, 175

fetal malformation, developmental toxicity, di-*n*-butyl phthalate, phthalic acid ester, rat, teratogenicity, 163

genotoxicity, tabun, agent GA, phosphoroamidocyanidic acid, dimethyl-, ethyl ester, mutagenic assays, 1
glutathione, protein thiols, HepG2 cells, avarone, 89

heavy metal interactions, alveolar macrophage, superoxide anion release, 13
hepatobiliary dysfunction, chlordecone, membrane permeability, plasma membrane, disposition, 123
HepG2 cells, glutathione, protein thiols, avarone, 89
histology, immunotoxicity, rat, mouse, lymphoid organs, 187

immunology, environmental pollution, macrophages, toxicology, pathology, 213
immunotoxicity, antibody response, corticosterone, natural killer cell, pentabromodiphenyl ether, thyroxine, 49
immunotoxicity, rat, mouse, histology, lymphoid organs, 187
in vitro tryptophan binding, 3-phenylamino-L-alanine, liver nuclear envelope, in vitro protein systhesis, 135
in vitro protein systhesis, 3-phenylamino-L-alanine, liver nuclear envelope, in vitro tryptophan binding, 135
isolated rat hepatocytes, allyl alcohol, 2-propen-1-ol, dithiothreitol, protein thiol groups, 147

kidney, duodenal mucosa, 2,3-dimercaptopropane-2-sulfonate, enzyme inhibition, enzyme protection, mercuric chloride poisoning, 29

liver nuclear envelope, 3-phenylamino-L-alanine, in vitro tryptophan binding, in vitro protein systhesis, 135
lymphoid organs, immunotoxicity, rat, mouse, histology, 187

macrophages, environmental pollution, toxicology, immunology, pathology, 213
membrane permeability, chlordecone, hepatobiliary dysfunction, plasma membrane, disposition, 123
mercuric chloride poisoning, duodenal mucosa, 2 3-dimercaptopropane-2-sulfonate, enzyme inhibition, enzyme protection, kidney, 29
mouse, immunotoxicity, rat, histology, lymphoid organs, 187
mutagenic assays, tabun, agent GA, phosphoroamidocyanidic acid, dimethyl-, ethyl ester, genotoxicity, 1

natural killer cell, antibody response, corticosterone, immunotoxicity, pentabromodiphenyl ether, thyroxine, 49
neurochemical effects, dopamine, polychlorinated biphenyls (PCBs), non-human primate (*Macaca nemestrina*), 71
non-human primate (*Macaca nemestrina*), dopamine, polychlorinated biphenyls (PCBs), neurochemical effects, 71
N-*p*-hydroxymethylbenzyl-D-glucamine dithiocarbamate, cadmium, excretion, distribution, chelate effect, *N*-benzyl-D-glucamine dithiocarbamate, 175

pathology, environmental pollution, macrophages, toxicology, immunology, 213
pentabromodiphenyl ether, antibody response, corticosterone, immunotoxicity, natural killer cell, thyroxine, 49
perfluoro-*n*-octanoic acid, cytochrome P4504A1, peroxisome proliferation, enzyme induction, 109
peroxisome proliferation, cytochrome P4504A1, perfluoro-*n*-octanoic acid, enzyme induction, 109
3-phenylamino-L-alanine, liver nuclear envelope, in vitro tryptophan binding, in vitro protein systhesis, 135
phosphoroamidocyanidic acid, tabun, agent GA, dimethyl-, ethyl ester, genotoxicity, mutagenic assays, 1
phthalic acid ester, developmental toxicity, di-*n*-butyl phthalate, rat, teratogenicity, fetal malformation, 163
plasma membrane, chlordecone, hepatobiliary dysfunction, membrane permeability, disposition, 123
polychlorinated biphenyls (PCBs), dopamine, non-human primate (*Macaca nemestrina*), neurochemical effects, 71
2-propen-1-ol, allyl alcohol, dithiothreitol, protein thiol groups, isolated rat hepatocytes, 147
protein thiol groups, allyl alcohol, 2-propen-1-ol, dithiothreitol, isolated rat hepatocytes, 147
protein thiols, glutathione, HepG2 cells, avarone, 89

rat, developmental toxicity, di-*n*-butyl phthalate, phthalic acid ester, teratogenicity, fetal malformation, 163
rat, immunotoxicity, mouse, histology, lymphoid organs, 187

structure-activity relationship, chlorinated dibenzo-*p*-dioxins, tryptophan 2,3-dioxygenase, tyrosine amino transferase, dose-response, 63
superoxide anion release, alveolar macrophage, heavy metal interactions, 13

tabun, agent GA, phosphoroamidocyanidic acid, dimethyl-, ethyl ester, genotoxicity, mutagenic assays, 1
teratogenicity, developmental toxicity, di-*n*-butyl phthalate, phthalic acid ester, rat, fetal malformation, 163
thyroxine, antibody response, corticosterone, immunotoxicity, natural killer cell, pentabromodiphenyl ether, 49
toxicology, environmental pollution, macrophages, immunology, pathology, 213
tryptophan 2,3-dioxygenase, tyrosine amino transferase, chlorinated dibenzo-*p*-dioxins, dose-response, structure-activity relationship, 63
tyrosine amino transferase, chlorinated dibenzo-*p*-dioxins, tryptophan 2,3-dioxygenase, dose-response, structure-activity relationship, 63
